Coastal Blackbutt

## Wide Board Australian Hardwoods

Australian Solar Timbers (AST) has specialised in Australian Hardwoods for 100 years, passing down the artisan craft from generation to generation. Our exciting range on Engineered Hardwood Flooring combines the same look and feel of traditional timber flooring with the added stability of state of the art engineered design.

Australian Hardwoods are renowned for their strength, unique colour variation, and vibrant display of character and markings. Keeping true to the natural beauty of Australian species, we have maintained a moderate level of natural feature to ensure your floor is one of a kind.

**NSW Spotted Gum**

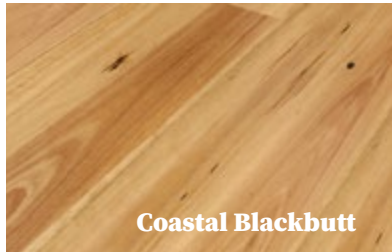

Uniquely designed in a four layer construction with indulgent 180mm cover width, AST uses matched species for both sawn face and balancing lamellas. AST's Engineered Hardwood flooring brings together the natural warmth and beauty of timber with added engineered stability to suit those with the most discerning style.
